

SAFETY INDUCTION TRAINING FOR OFFSHORE PLATFORM

Introduction

This training will provide the participants with theory and practical sessions to understand the essentials of sea safety. The training serves as an induction training for non-seafarer personal who will be performing their technical trade tasks on-board ocean-going vessels and also for those who are already seafarers, this training enhances their existing knowledge to maintain the safety conscious mind frame and the attitude of always be prepared for any emergency that may arise on board their vessel. Participants will gain an appreciation of the potential hazards and control measures they may encounter.

The training includes both theoretical and practical elements which are performed on board a vessel to gain a realistic understanding and sense of emergencies when off shore.

Objectives

The aim of the course is to enable Trainees:

- To gain the correct knowledge and skill to respond appropriately to any emergency situation that may arise off shore.
- Identifying generic hazards and understand the control measurements employed to mitigate the dangers they pose.
- To have the necessary knowledge which covers first aid at sea and survival at sea techniques which includes both life boats and life rafts?
- Demonstrate their understanding to use basic firefighting equipment and techniques employed for shipboard firefighting and emergency response procedures.
- Have a good working relationship with every person onboard

Outline

This course content will cover the following areas.

1. First Aid at sea
2. Sea Survival course
3. Fire fighting
4. Major accident hazards
5. Workplace hazards and personal safety
6. Risk management
7. Social responsibility
8. ISPS Code awareness

Course Outcomes

After successfully completing this course and passing the prescribed assessments, participants will have the competency, knowledge and understanding to participate in any emergencies on board vessels and have the correct attitude and mind frame to identify potential hazards that may pose a danger to human life, property and environment.

Pre-requisite

This course framework requires some knowledge of basic occupational health and safety measures and emergencies procedures on board vessels.

Training Facilities

Ship board training facility.

Certificates

On successful completion of the course and having passed all assessments, participants will be issued a Sea safety certificate which references the relevant STCW Codes.

Miscellaneous

Candidates attending this training must be 100% in attendance.

Training Details and Costs

Duration: 15 days
Time: 08.00am to 04.00pm
Tuition Fees: TBA
Venue: PMTC, Konedobu
Min number of persons: 10 persons
